What is PeekaBoo Babies?

PeekaBoo Babies is a fun, free and fast way to spread the news of your baby's birth by putting the baby's hospital photo on the Internet for family and friends to see soon after birth!

How to Participate

Just complete the Growing Family order form and indicate that you want your baby's photo to appear on our Web site (Web Nursery). The photo will be posted about 48 to 72 hours after you leave the hospital. You also will have an opportunity to buy a Growing Family photo package, however there is no obligation to buy photos in order to participate in PeekaBoo Babies on the Internet. The baby's photo will stay on the Web site approximately 90 days.

Where to Find PeekaBoo Babies

Select PeekaBoo Babies from the OhioHealth home page (www.ohiohealth.com). Choose the hospital where the baby was born. Babies are listed by first name, last initial and birth date. Click on your baby's name and the photo page will appear. Loved ones who visit the site may leave a message for you and your baby's photo page as well. Be sure to check the site frequently for heartwarming greetings!

Safety

As our patient, the health and safety of you and your baby are our first priorities. To ensure safety, we post the baby's photo 48 to 72 hours after your leave the hospital, when you are likely to be home with your baby. Only the baby's first name and initial of the last name are shown, along with birth date – not baby's last name.

For added security, you may password protect your baby's photo. Just click the Parent Options button and supply a password so only people to whom you give the personal password will be able to view the photo.

Note: to use the password protect option, you must supply the Photo ID number from the Growing Family order form (found at the top of the page).

Tell Your Friends and Family

Spread the good news of your baby's birth by telling friends and family how to see the baby:

1. Go to www.ohiohealth.com
2. Click on PeekaBoo Babies
3. Click on your baby's name and birth date
4. Enter password if applicable
